Guidebook for Flight planning
Single flight.
*Risky procedure*

Single flight + transverse strip.
*Robust procedure*

Dual flight.
*Optimal procedure*
Guidebook for flight planning / linear mapping

Simple flight.
*Risky procedure*

Dual flight.
*Optimal procedure*
Circular flight with 75% overlap between successive shots.

In this example, the circular flight will allow you to precisely photograph facades.
**GOOD**

Vertical shots: 75% overlap

High oblique shots

**BAD**

Vertical shots: insufficient overlap <50%

Low oblique shots: too grazing
